

Hiawatha Round Table Comments

Boy Scout Breakout Session

NOVEMBER 5 2009 – Realistic First Aid

What do you get when you mix corn syrup, chocolate syrup, and red food coloring? Moulage, or fake blood for use in realistic first aid. We'll share recipes, training ideas, and disaster simulations that are popular for use with Scouts. Be prepared to volunteer to "get hurt" (and an old shirt?).

Also - remember the Scouting for Food challenge. Let's show the Cub Scout side what Boy Scouts can deliver by bringing your food items to roundtable.
